- You might want to send a reminder now for folks to look at the flow chart so we can try to have a productive call, as that will be the main item to discuss.
- Also, there was not much discussion of St. Joe request. FDEP was looking into whether they would need to reopen the rule to accommodate the request, but we should be prepared with our perspective if possible. I would think as a GP it would need to be approved, so part of the package.
- We'll need to talk to FDEP about where they see the MOA as standing re: ESA language. I suspect it's a matter of waiting to see how the BA process turns out (especially re: RP) and then inserting the appropriate process language, but we need to get their perspective.
- I've reached out to Ntale, but still not connected.

Rosemary,

I was just looking through your notes from last week. Did we have any action items for our call with FL today? The agenda I planned for our internal call was:

- see if folks had reviewed the Flowchart.
- I was going to ask that you or Tom reach out to NEPA for guidance with the FDOT issues, I got an email back from Roshanna White last Monday that said, "This topic is something that must be discussed with the NEPA manager. I will get back with you as soon as a conclusion is decided." But haven't heard anything since.
- Was there much discussion of the St Joe request? If not, we can talk about that

Hi, Kelly – Do you have what you need to lead the assumption calls today? Tom may not be able to participate and I have mid-years, etc., so limited time to prepare.
